TECHNICAL SKILLS

PROGRAMMING LANGUAGES

C, C++, Java, JavaScript,
TypeScript

FRONTEND TECHNOLOGIES

React, NextJS, HTML, CSS,
Tailwind

BACKEND TECHNOLOGIES

Spring Boot, Express, NodeJS

Databases

MySQL, MongoDB

SOFT SKILLS

- Attention to Detail
- Problem-Solving
- Team Player
- Adaptability
- Communication Skills
- Continuous Learning

SAJITH BANDARA

Computer Science Undergraduate
University of Colombo School of Computing

ABOUT ME

I am an undergraduate with extensive experience in university projects. I am passionate about Full Stack Development, with expertise in backend and frontend development, microservice architecture and database handling. My strong foundation in design principles and OOP, combined with hands-on experience across various technologies, makes me a valuable asset to any software development team.

EDUCATION

- University of Colombo School of Computing** 2022 - PRESENT
Bsc in Computer Science (UG)
- R/New town Prince College - Rathnapura** 2011 - 2019
Advanced Level in Physical Science
 - Physics A
 - Combined Mathematics B
 - Chemistry B

PROJECTS

ENMO Skill Platform

2023 May - 2024 April

- This project is designed for Freelancers in Sri Lanka.
- We utilized a client-server architecture. I implemented contact support ticket handling, user profile manages, email verifications, and all deployment processes for the Projects.
- Technical Stack:** Java, HTML, CSS, JS, MySQL.

Recruite Ease

2024 May - Present

- This project is job recruitment and application tracking platform.
- The project is still ongoing. We utilized a microservice architecture. I have contributed to interview service both frontend and backend.
- Technical Stack:** Java Spring Boot, Next.js, Tailwind CSS, and NextUI, MongoDB, MySQL.

ManageMart

2024-May - Present

- ManageMart is a comprehensive application designed to facilitate the delivery of food stocks to retail shops by salesmen. It enables wholesale shops to monitor their stock levels and manage various aspects of their operations effectively.

- The project is still ongoing. I have contributed for developing frontend user interfaces related to the administrator using Nextjs and am currently working on the backend development related to the administrator module.
- **Technical Stack: Java Spring Boot, Next.js, Tailwind CSS, and NextUI, MySQL.**

Knowledge NEXUS

2023 July - 2023 September

- This is a library management system including functionalities like lending books, handle returning books, book donations and user management.
- We utilized Client - Server architecture. In this project, I implemented the CRUD functionalities related to fines when the books are returned late.
- **Technical Stack: MERN**

WarranTrack

2024 August - Present

- This system tracks the status of items during the repair process and facilitates communication between repair centers and customers.
- I am responsible for both the frontend and backend development. Currently, I have set up and am working on the frontend, with plans to begin the backend implementation soon.
- **Technical Stack: MERN with Tailwind CSS.**

CERTIFICATION

Data Structures & Backend with Java

Authorized by Board Infinity and offered through Coursera

The Complete java Certification Course

Authorized by Job Ready Programmer through Udemy

React: Using TypeScript

Authorized by Emmanuel Henri through LinkedIn
